Jonathan Mark Mwigo

SOFTWARE DEVELOPER

OBJECTIVE

To obtain a challenging Software Developer position where my expertise in Java, SpringBoot, JavaFX, and Flutter, along with my creativity and problem-solving skills, can be leveraged to build fast, reliable, and user-friendly applications that enhance user experiences and contribute to business growth and success

---

EXPERIENCE

LEAD DEVELOPER - INFOSEC TECHNOLOGIES (U) LTD

October 2023 – June 2024

- Led the Flutter mobile app development team, mentoring junior developers to enhance their coding skills and improve overall development efficiency.
- Oversaw the creation of wireframes, prototypes, and high-fidelity mockups for multiple mobile projects.
- Collaborated closely with clients to understand their requirements and translate them into effective and user-friendly mobile applications.

MOBILE APPLICATION CONSULTANT - NETIFY IT (U) LTD

April 2023 – July 2023

- Outsourced to lead a team of developers in building a mobile application that significantly enhanced user engagement.
- Spearheaded the development process by conducting user research and usability testing, ensuring the app's design decisions were data-driven and user-centric.
- Worked closely with the development team to guarantee that the app was built with precision, leading to a successful launch and positive user feedback.

PL/SQL & ORACLE APEX DEVELOPER - GBI SOLUTIONS (U) LTD

August 2022 – February 2023

- Conducted thorough user requirements analysis and created detailed user profiles to guide the development of database applications.
- Designed efficient workflows, schema layouts, and interactive forms for an enterprise application that received recognition for innovation in the industry.
